

HydroSeal™

Silicone Cannula

Experience seamless access with CONMED's flexible silicone cannula – enhancing maneuverability, safeguarding soft tissues, and maintaining a clear surgical field.

A cannula that manages the workspace so you can focus on the work.

- Low-profile distal flange sits flush against soft tissue and maintains an open workspace
- Large inner diameter facilitates seamless instrument entry & removal
- Double dam manages fluid and minimizes leakage
- Flexible cannula enhances maneuverability inside the workspace
- Removable spacer and ribs along the axis allow for fine-tuning length and the perfect fit in-between sizes

BioBrace.

Reinforced BioInductive Implant

Why use BioBrace®

- Reinforcement of soft tissue through supplemental strength & load sharing^{1,2}
- Generates new tissue via highly porous 3D DNA absent collagen sponge^{1,2}
- Fully resorbable^{1,2}
- Off-the-shelf convenience
- Suture compatibility and handling characteristics reduce added cost & OR time
- Designed to improve patient outcomes and quicker return to sport/activity

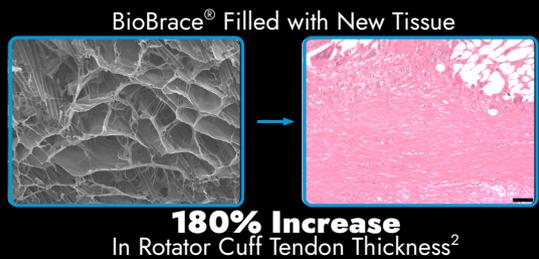

Reinforce

Provides supplemental strength through load sharing^{1,2}

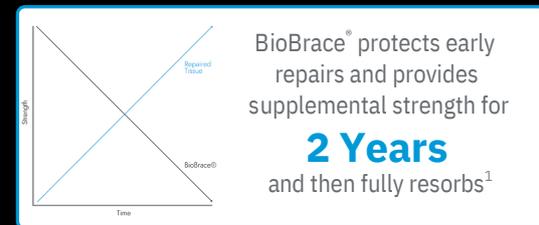

Generates New Tissue

Biologic scaffold facilitates and optimizes healing^{1,2}

Resorb

Supports tissue for ~ 2 years before naturally resorbing^{1,2}
